BIRD STUDY GROUP NEWSLETTER

Volume 6, Number 8
March 31, 1992

Bird Alert Service: Phone 318,797-5338, Mon. through Fri. after 5:00 PM
Bird Feeders and Birding Supplies: LSUS Museum of Life Sciences

BOARD OF DIRECTORS 1991-92

President - WILL SMOLENSKI, 1
Vice-President - HUBERT HERVEY, 3
Secretary - NORMA COBB, 3
Treasurer - BETTY MASON, 3
Members at Large:
ED BITOWSKI, 1
CONNIE CONNORS, 1
BILL HALL, 2
MAC HARDY, 2
JIM INGOLD, 3
CHARLIE LYON, 1
JAMES MCCAIN, Jr., 2
VELDA NEILSON, 2
DICK ROLANDT, 1
ROSEMARY SEIDLER, 2
CAROLINE UPCHURCH, 3

NEXT MONTHLY MEETING:

Tuesday, 14 April 1992, 7:00 PM in the
Museum of Life Sciences on the LSUS
campus. Mr. Richard McMullen will
present a program entitled "The Birds of
Bodcau Bayou and the Plants they
Utilize"

NEXT BOARD MEETING:

Tuesday, May 5, 7:00 PM, at Will
Smolenski's home (526 Dunmoreland Dr.;
phone 865-2938).

COMMITTEE CHAIRPERSONS

BIRD REPORT -- Connie Connors 865-6422
BIRD HOT SPOTS -- Larry Raymond 929-2806, Will Smolenski 865-2938
FIELD TRIPS -- Bill Hall 797-1727, Charles Lyon 865-2674
FUND RAISING -- Ed Bitowski 688-4848
GIFT SHOP -- Caroline Upchurch 227-7845 w, 861-3914 h
HISTORIAN -- Jim McCain 929-2691 w, 929-7285 h
HOSPITALITY -- Velda Neilson 1-872-4821, Betty Mason 687-0225
LIBRARIAN -- Jim Ingold 797-5236 w, 742-5067 h
MEMBERSHIP -- Shirley Huss 865-5959
NEWSLETTER -- Mac Hardy 797-5338 w, 687-6738 h
BEGINNING BIRDERS -- Larry Raymond 929-2806, Jim Ingold 797-5236
PHONE TREE -- Dick Rolandt 797-0255
PROGRAMS -- Hubert Hervey 925-9249
PUBLICITY -- Bobbe Wommack 797-6509
SHORT PROGRAMS -- Pat Lonacker 865-4701
SPECIAL EVENTS -- Rosemary Seidler 869-5231 w, 424-2972 h

NEXT MEETING == APRIL 14 AT THE MUSEUM
THE GIFT SHOP CAN SPECIAL ORDER FOR YOUR BIRDING NEEDS

BIRD QUIZ #2

Birds are noted for their songs which are produced by the syrinx. Birds can also produce sounds in other ways. For the birds below, identify the specific body part they use to produce a non-vocal sound.

1. Ruffed Grouse
2. Common Flicker
3. Short-eared Owl
4. Common Snipe
5. American Woodcock

Answers to Bird Quiz #1

1. Timberdoodle - American Woodcock
2. Blackjack - Ring-necked Duck
3. Rain Crow - Yellow-billed Cuckoo
4. Hairyhead - Hooded Merganser
5. Mexican Squealer - Fulvous Whistling Duck

Board of Directors Meeting

The Shreveport Society for Nature Study Bird Study Group board meeting was held on Tuesday, March 3, 1992 at the home of Norma Cobb. Will Smolenski opened the meeting at 7:05p.m. and previous minutes were accepted.

Betty Mason gave the financial report stating that there was a balance of \$1,187.00. We had income of \$224.80, expenses of \$34.01 leaving a balance of \$1,377.89. The Post Office balance was \$71.11.

Caroline Upchurch spoke of branching out in the gift shop and checking with Glamor Home Products since most merchandising outlets want to sell in too large quantities for our group.

It was suggested that we start putting articles on club members in our newsletter.

The Phone Tree and Bird Alert were discussed and also what birds should be called in to the Phone Tree. It was decided that anything uncommon for this area should be called in and each person can decide the importance of that bird to him.

Field trips were March 7, leaving LSUS campus at 5:00 a.m. going to Bodcau to see wild turkey and March 21 going to Pat

Sewell's farm and the Louisiana Experiment Station.

The program for March is by Velda Neilson. Richard McMullen will speak in April on wild turkey and the birds of Bodcau. In May we will have Ray C. Telfair II from the Texas Parks and Wildlife Department of Research. He has banded and studied cattle egrets for years.

A motion was made and accepted to subscribe to the North American Blue Bird Society publication on a continuing basis for our library.

Larry Raymond and Dr. Hardy are updating our checklist for this area.

A short program before the regular program was suggested in order to utilize our group talent and less business in the regular meeting would help us get out earlier.

Names were mentioned for new board members and officers. The next board meeting is May 5 at Will Smolenski's. Officers will be elected at that time.

Refreshments were served and the meeting was adjourned.

NEW CHECKLIST

The new *Field Checklist of the Birds of Northwestern Louisiana* is ready. The following 11 species have been added:

Red-throated Loon
Brown Pelican
Ross' Goose
White-winged Scoter
Black-necked Stilt
Band-tailed Pigeon
Ringed Turtle-Dove
Say's Phoebe
Ash-throated Flycatcher
Golden-crowned Sparrow
House Finch

These additions are species for which there is documentation in the scientific literature or a specimen is available from this area.

Common names that are different from the

old list and that are now official are the following (new followed by old):

Barn Owl for Common Barn-Owl
American Pipit for Water Pipit

Also, four typographical errors were corrected.

NATCHITOCHEs TRIP

(Continued from Vol. 6, No. 7)

We passed by Briarwood earlier, so much loved by Caroline Dorman, and a must stop if it is open when you travel this way. We passed a pasture of troubled pitcher plants, in trouble because of cattle damage. This spot is nearing Saline. Saline was so named because of a spring or well of salty water used by animals, natives, settlers, and civil war soldiers, each in their time. It is located at the edge of town.

After a warm-up and good hamburger at Kalico Kitchen in Saline, home of the water melon festival and the picturesque setting for rural scenes in "Blaze," we went a mile or so to Mill Creek Reservoir. This small lake has clear water and a sandy bottom ideal for swimming, so we were told.

Crossing across Black Lake Dam on Hwy. 9 I let it slip that we had 40 species. My companions joint elation almost caused us to miss the first **Yellow-rumped Warblers** of the day. The Cypress trees in Black Lake are stark sentinels of a problem. They are bare and ugly in death and if I know Cypress wood they will stand for many years as symbols of mans' failure to understand his environment and manage it wisely.

On we went to Campti and the Campti cut-off road which traverses rich Red River bottom land. Here many **Red-tailed Hawks** find our rodent population sets the table for their winter meals.

I had hopes of seeing the endangered Sturgeon at the Natchitoches Fish Hatchery, which has approval to keep this rare river fish and attempt to propagate it. The wind was fierce as we dropped Charlie Harrington off and congratulated him for finding his way back. He never could have made it without help from wonder dog, "Lady Dogg."

At the fish hatchery the first thing we saw was a **Mallard** drake flying backward. The wind was a gale and at full forward effort a hover was the best a duck could accomplish. The storm had knocked out the electric power and the aquarium was dark. Hatchery personnel were busily starting and hooking up gas powered air pumps outside the buildings that house the fish holding tanks in order to aerate them. I was leaning into the gale trying to turn an **American Pipit** into a **Sprague's Pipit** by seeing stripes on its back when the wind abated a little causing me to nearly fall on my face. A fierce cloud was southeast of us, but the rain had stopped. One shallow pool had several large paddlefish in it. A hatchery employee told us that the Sturgeon had not yet been caught, but all was in readiness for them. Three **Mallards** never did land while we were there -- they were afraid of being blown backwards on their keesters by the gale and decided the air was the safest haven for them. Fifteen **Least Sandpipers** also made no headway into the wind for so many minutes that we tired of watching their efforts at regrouping and progressing in the face of such a gale. We humans often miss observing the survival "daring do" of animals in nature by not doing the daring and being out to observe during natures extremes.

We left Natchitoches and enjoyed some good duck scoping in the I-49 east side bar pits. The male **Northern Harrier** was resplendent in grey and blackish garb, as if ready to go out courting. Good luck fellow, it won't be long now.

And so ends this saga of wonder dog alias "Lady Dogg" and wonder farmer alias Hubert "Bring'em back alive" Hervey. Our charges once again have been returned alive and well. Maybe it does take just a little bit of a nut to enjoy a day like that -- don't you wish you'd been along!

P.S. For her never complaining, trusting, determined and enthusiastic attitude Rosemary deserves the title, "Wonder Birder"!

*** Hubert Hervey

NEW BOARD MEMBERS

We will elect five new board members at the April meeting. Be there to defend

yourself. The nominees are: Will Smolenski, Bobbe Wommack, Pat Lonnecker, and Shirley Iuss. We need one more nomination so if you have a suggestion call Will Smolenski. If necessary we will take nominations from the floor at the next meeting.

REGULAR MEETING MINUTES

The regular monthly meeting of the Shreveport Society for Nature Study Bird Study Group was held on Tuesday March 10, 1992 in the Museum of Life Sciences on the LSU campus. Will Smolenski, President, opened the meeting at 7:05 p.m. Our guests were Sherry Souba and daughter and Bill McCleary.

Betty Mason gave the financial report starting with a balance on February 11 of \$1,187.10. We had income of \$224.80, expenses of \$147.30, leaving a balance of \$1,264.60. The Post Office balance was \$53.53.

We were reminded of the trip to Pat Jewell's farm and the Louisiana Experiment Station on March 21.

The trip to Bodcau to see the wild turkey led by Paul Dickson and Richard McMullen was outstanding. A lot of turkeys were seen and heard and some came up to the vehicle. Paul did his turkey calls for us at the meeting. He also brought two baby Emus and their eggs to show.

The Caroline Dorman trip did not materialize but it was noted that this is a worthwhile trip to consider on our own.

We had membership renewals bringing our membership to 130.

An explanation of the bird alert and the phone tree was given.

Jim Ingold spoke to the A.C. Steere school on Novice Birding.

Remember the funding for our Louisiana Natural Heritage Program is in danger of being cut. We need to write to Governor Edwards and Joe Herring, Director of Wildlife

and Fisheries. A sample letter by Caroline Upchurch is on the bulletin board at the museum.

Five new board members will be elected and Will asked that you tell him if you are interested in serving or of someone you think would like to serve.

During "Birdtalk", Greater Road Runners, a Solitary Vireo, Rufus-sided Towhee, Barn Swallow, Tree Swallow and geese going north were reported.

Richard McMullen will speak at our April meeting on wild birds and feed. Ray C. Telfair II of the Texas Wildlife and Fisheries will speak to us in May on the cattle egret.

Our program by Velda Neilson on her trip to South Texas with friends Pat Lonnecker and Vicki Camp was very exciting. Even though they admitted choosing on off time for birding they still had a great time and want to go back.

The meeting was adjourned at 8:50 p.m.

BIRD ALERT AND THE PHONE TREE

Some birders have asked when they should use the Bird Alert Hotline and when they should use the Phone Tree. The Bird Alert is a taped message on the Museum's answering machine. It is available 24 hours a day, 7 days a week. It should be used to report bird records for the newsletter, to ask questions regarding birds or the Bird Study Group, to find out details of recent sightings of uncommon or rare birds in our area, and to leave details of any such sightings. The Bird Alert is not an immediate response system; it is for the convenience of birders who wish to communicate findings.

The Phone Tree is an immediate response system. Sightings of rare birds that need confirmation as soon as possible should be phoned to coordinator Dick Rolandt (797-0255 or Will Smolenski (865-2938). Any reports phoned to them will be immediately transmitted to other birders on the phone

tree. The purpose is to get the message to other birders quickly enough (within minutes) so that others can confirm and/or enjoy the birds. Rare birds that might not remain in the area should be called in to the phone tree.

In summary, the Phone Tree is fast and limited to the persons on the phone tree. The Bird Alert is slower and is available to everyone.

BOOKS NEEDED

The Gosse Bird Club of Jamaica is working with a group of teenagers who have become very keen on learning about birds. Although working with slides and in the field, they are hampered by a lack of guide books. Do you have any older editions of guides that you would be willing to donate to the Club for this use? Send them to: Catherine Levy, 2 Starlight Ave., Kingston 6, Jamaica, W. I.

ENDANGERED SPECIES

Now is the time to write to your Congressman concerning re-authorization of the Endangered Species Act. Urge your Representatives to support HR 4045, the Endangered Species Act Amendments of 1992, introduced by Congressman Studds of MA and co-sponsored by 30 others. Oppose any bill that would weaken the Act. You may voice your opinion by calling 202-224-3121 and asking for your Representative by name.

The Wild Turkeys of Bodcau Bayou

I have to admit, it's not often I get up at 4:00 am in the morning to go birding, much less do anything else. However, the chance to hear and observe Wild Turkeys in Louisiana was an opportunity I couldn't pass up. To be honest, I'm really trying to pad my list for the L.O.S. state year list contest. I'm up to 183 species as of March 13, but that's another story. So, back to the turkeys! There were 7 blurry-eyed birders, including out trip leader Paul Dickson, that met at the Life Sciences Museum at 5:00 am to make the journey to the Bodcau Bayou Wildlife Management Area just east of Benton. My expectation of seeing spectacular views of

these magnificent creatures weren't really great. I figured we would probably see a few scurry through the woods and that would be it. We met Richard McMullen, the manager of the Bodcau Bayou Wildlife Management Area, around 6:00 am. and after a short drive we arrived at the area where the turkeys had been seen. Upon arrival, Paul began to imitate a Barred Owl, at which he is quite good. He was promptly answered by, you guessed it, a Barred Owl. The owl flew into a tree less than thirty feet from us. No turkey, but the morning was off to an excellent start. According to Paul, turkeys will response to any loud noise. As Paul continued to call, we could hear hens and gobblers in the woods no more than 100 feet away. Richard and Paul estimated that there were around 25 hens with 5 or 6 gobblers. They all sounded alike to me, but according to Paul each hen and gobbler has a different call. We all sat in Mac's van waiting patiently and staring intently down a dirt road in hopes of seeing a wild turkey. After several minutes, an immature male, called a jake, timidly walked onto the road in front of us. However, one quick glance at our van and he headed back into the woods with a very erect posture and giving an alarm call. This posture and call combine to warn other turkeys of danger. I'm thinking to myself, I really got up at 4:00 am to see one turkey warn all his buddies to stay in the woods. After another five or ten minutes, the young jake again strolled onto the road. This time he was in good view for at least a whole minute and everyone got a great look. Richard decided we should back the van up and check another dirt road about twenty feet behind us. Just as Mac was about to hit the ignition switch Jackie McVey yelled for everyone to freeze. Just to the left of us and less than fifteen feet from the van were six hens and a gobbler. Just to make things even more impressive the gobbler began to strut. We observed them for several minutes when they suddenly disappeared into the woods. Strangely enough, they were spooked by a White-tailed Deer that ran right past us. Well, we figured this was the highlight of the day, but much to our surprise the excitement wasn't over yet. As we continued to look down the road, Paul got out and began to call like a hen. Paul is famous for his turkey calling and has even been stalked by turkey hunters. Being around Paul and Richard for a couple of hours was like taking

a course in Wild Turkey behavior. Both are very knowledgeable and were eager to answer all our questions. Paul's calling attracted the attention of four hens that were at the end of the road some one hundred feet away. These hens ran up the road at a feverish pace with a look in their eyes that spelled trouble. I could see the headlines now "Birder Mutilated by Four Mad Turkeys." These hens were on a seek and destroy mission and Paul was their target. It was the kind of stuff one would expect to see on Public Television's Wild America. Actual, it was quite amusing as this part of our outing came to a close. Oh yes, Paul escaped alive.

It was an eventful outing, being able to see thirteen of Bodcau Bayou's Wild Turkeys in their nature habitat. More so, we were able to share a birding experience that only those brave enough to set their alarms for 4:00 am could hope to witness.

*** Bill Wood

MESSAGE from the PRESIDENT

What a beautiful time of year! Birds abound in the new foliage. Now that the leaves are out it is more difficult to sometimes find our feathered friends. A little twitter or slight movement catches our attention. Now -- patience till a movement

exposes our quarry, hopefully to make a positive identification. Their plumage is generally brightest during the breeding season and may vary significantly from wintertime. Reidentifying the same bird in a different season can sometimes become a challenge.

There are still a number of strangers that are occasionally sighted in our area. The spring migration is not over. Up to 60 Lesser Golden-Plovers were recently seen on the LSUS campus. When put on the phone tree only one in ten calls produced someone at home. Be sure to report unusual sightings to make it available for others to see as well as help confirm a find.

When you see a bird or a pair come to your garden to find a grub, worm, or bug and fly away only to return on repeated trips, it probably indicates a nest nearby. Try to find it and enjoy watching the brood grow up.

Last night my son in Baton Rouge called and said that our granddaughter, seven, was collecting information on a family of Carolina Wrens that has taken up residency in one of their bird houses. She is to give a report about them in school.

We all need to teach our children and grandchildren to watch the birds and observe and enjoy the wonders of nature.

*** Will Smolenski

BIRD NOTES -- MARCH

Compiled
March 29, 1992

Report bird records for the Newsletter to Connie Connors (865-6422) by the 25th of each month. Only records not printed since last Newsletter are published.

Following each species is a line of data in the following format: date, initials of observer, number of birds observed; initials of another observer, number of birds observed; etc.). For example: 15 PD 3; BW 1,5) means that on the fifteenth PD saw 3 birds, BW saw 1 at one locality and 5 at another. For the number of birds observed, a one is used both for one specimen or for numbers not reported by the observer. Two (or more) numbers following an observer are numbers of birds seen at two (or more) different localities. All bird records reported here are the responsibility of the observer. The Bird Study Group is reporting observations on the word of the observers.
